

☰ TooToo 2025

Full Screen: TooToo 2025

Concept

TooToo 2025

- TooToo 2025 uses the GitHub API to provide access to all the current files in a repository hosted with GitHub Pages.
- Interact with files with the fewest possible clicks. As easy as sending an email
- Accordion tree view menu of all the files in a repository.
- Browse the entire contents of files in a repository very quickly
- View contents of many file types including images, text, and HTML files.
- Open files in a new tab or window so they can be printed or shared.
- Hosted on GitHub Pages, so all benefits and safety of GitHub.
- Viewed using Pages, no server required.
- Code is plain HTML, CSS, and JavaScript.
- No dependencies, no frameworks, no libraries.
- No need to install anything.
- Works on all modern browsers.
- Runs locally on your computer.

Tootoo Edit

- Everything in Tootoo 2025
- Every file links to
- Its source code on GitHub
- A text editor to edit the file
- View the file in a new tab

Text you can include in read me files

▼ Details

Things you can do using this script

- Click the three bars('hamburger menu icon') to slide the menu in and out

- Click the GitHub Octocat icon to view or edit the source code on GitHub
- Click on title to reload the page
- Press Control-U/Command-Option-U to view the source code
- Press Control-Shift-J/Command-Option-J to see if the JavaScript console reports any errors

To Do / Wish List

- 2025-06-04 ~ click anywhere to toggle the menu visibility
- 2025-05-31 ~ toggle between edit and view mode
- 2025-05-29 ~ date sorting folders are identified in COR{}
- 2025-05-29 ~ Add new file
- 2025-05-25 ~ omitting the date from the file name in the menu, and adding the date to the file title
- 2025-05-20 ~ Add a button to open files by going directly to repo and not using Pages ~ do pages without Pages!?!
- 2023-10-14 ~ Find text in files
- 2023-10-13 ~ Check if follows Win11 light and dark mode

Change Log

2025-05-31

- Clean-up & refactor
- 2023-10-14 ~ Cursor keys to load next file in menu

prompt

Suggest further improvements, retaining the notion that the project is intended to be as simple as possible, and given that the project operates in a known and well-maintained environment, it requires only the minimum of error checking, if any

Prompt

On the tree view menu, add the capability to open and view the next or previous file in the menu using the cursor keys.

prompt

currently there is a toggle to open or close all the details tags in the tree view.

Improve this by adding a right-click menu to toggle between opening and closing all the sub-folders of the currently selected details tag in the tree view.

worked!

prompt:

Add a function that scales the text size larger and smaller of all the item in the menu and body, including the tree view, using two buttons, one to increase the text size and one to decrease it.

Worked!

2025-05-29

- 2025-05-25 ~ sort folders with files starting with dates with newest at top

Prompt, this worked!

on a hash change make sure its associated "file-container" menu item for that item is visible by setting all its parent details to open. Do this in the simplest way possible, by using the "open" attribute of the details tag.

2025-05-26

Another complicated day.

I tried to get rid of notesy. but failed. Something to do with permissions and GAT.

Other than that, I'm not sure what I got done except for a code cleanup.

2025-05-25

Prompt: divNavTreeView is populated with many details tags. create a button with a function to collapse all the details tags

Done

- 2025-05-16 ~ Add collapse open all toggle button
- TooToo Edit is working

- 2025-05-25 ~ images in div content directly
- 2025-05-24 ~ Update TooToo Edit to same level as TooToo

2025-05-24

- Now uses short hash links to files in the repo
- Fixed links being supplanted bt default file
- Added TooToo to Theo 2025
- Fixed tab titles
- Updates test files

2025-05-22

- Update notesy added ~ now always in markdown text format
- Tootooo Edit: edit and view files only on the repo, not locally

2025-05-20

Done or deprecated

- 2025-05-20 ~ Images in div content directly
- 2025-05-20 ~ Iframe files for different types of files
- 2025-01-16 ~ Add GitHub icon to each file
- 2025-01-16 ~ Bring Notesy into same page
- 2025-01-16 ~ Notesy data displayed as text not HTML
- 2025-01-16 ~ update style sheet
- 2025-01-16 ~ check links for GitHub icons

2025-05-14

Trying to fix Source Control issues

2025-04-26

- Add diminishing font size to folder titles
- Add indents to folder titles

2025-01-16

- Latest TooToo copied from Heritage Happenings
- agenda, pages, Heritage Happenings, pushme-pullyou assets, tootoo 2025, qdata: all up to date

Done

- 2025-01-09 ~ replace grv with gfv (pp-assets/cookbook/github-files-view)
- 2025-01-09 ~ Create simple file open script using readme.html
- 2023-10-14 ~ Add tootoo to pushme-pullyou/assets
- 2023-10-13 ~ Add edit file and save to GitHub
- 2023-10-13 ~ Hamburger menu that is out of the way

2025-01-11

- embedded menu code in the HTML file, dropped menu.js

2025-01-10

It's working according to the dream!

- github-file-open.js ~ remake of my longstanding readme.html script is in and working
- github-tree-view.js ~ GitHubCopilot remake of grv is in and working

We now have a super simple Github Pages content management system!

Is this a dream come true?

2025-01-09 ~ First commit
